T-106 wherever you look around the world , you discover that these are not cultures destined to fade away ; these are dynamic living peoples being driven out of existence by identifiable forces that are beyond their capacity to adapt to : whether it &apos;s the egregious deforestation in the homeland of the penan -- a nomadic people from southeast asia , from sarawak -- a people who lived free in the forest until a generation ago , and now have all been reduced to servitude and prostitution on the banks of the rivers , where you can see the river itself is soiled with the silt that seems to be carrying half of borneo away to the south china sea , where the japanese freighters hang light in the horizon ready to fill their holds with raw logs ripped from the forest -- or , in the case of the yanomami , it &apos;s the disease entities that have come in , in the wake of the discovery of gold .

S-82 was ayahuasca so faszinierend macht , ist nicht nur das pharmakologische potential dieses präparats , sondern dessen verarbeitung . es wird wirklich aus zwei verschiedenen quellen hergestellt . auf der einen seite , gibt es diese hölzerne liane , die eine reihe von betakarbolinen , harmain , harmolin , leicht halluzinogen , birgt . diese kletterpflanze allein einzunehmen ist ungefähr so als ob sich ein blauer trüber rauch auf ihr bewusstsein legt , es wird jedoch mit den blättern eines strauchs aus der familie der kaffeepflanzen mit dem namen psychotria viridis vermischt .

T-82 what makes ayahuasca fascinating is not the sheer pharmacological potential of this preparation , but the elaboration of it . it &apos;s made really of two different sources : on the one hand , this woody liana which has in it a series of beta-carbolines , harmine , harmaline , mildly hallucinogenic -- to take the vine alone is rather to have sort of blue hazy smoke drift across your consciousness -- but it &apos;s mixed with the leaves of a shrub in the coffee family called psychotria viridis .

S-1 einfach das wissen , dass jaguar-schamanen noch immer jenseits der milchstraße reisen oder die bedeutung der mythen der ältesten der inuit noch voller bedeutung sind , oder dass im himalaya die buddhisten noch immer den atem des dharmas verfolgen , bedeutet , sich die zentrale offenbarung der anthropologie ins gedächtnis zu rufen , das ist der gedanke , dass die welt , in der wir leben , nicht in einem absoluten sinn existiert , sondern nur als ein modell der realität , als eine folge einer gruppe von bestimmten möglichkeiten der anpassung die unsere ahnen , wenngleich erfolgreich , vor vielen generationen wählten .

T-1 just to know that jaguar shamans still journey beyond the milky way , or the myths of the inuit elders still resonate with meaning , or that in the himalaya , the buddhists still pursue the breath of the dharmas , is to really remember the central revelation of anthropology , and that is the idea that the world in which we live does not exist in some absolute sense , but is just one model of reality , the consequence of one particular set of adaptive choices that our lineage made , albeit successfully , many generations ago .

S-5270 wie kann ich in zehn minuten über die verbundenheit zwischen frauen über drei generationen sprechen , und wie die erstaunliche stärke dieser verbundenheit sich im leben eines vierjährigen mädchens manifestierte , als sie vor über 30 jahren mit ihrer kleinen schwester , ihrer mutter und ihrer großmutter fünf tage und nächte lang zusammengekauert in einem kleinen boot im chinesischen meer saß . eine verbundenheit , die sich im leben dieses kleinen mädchens fest verankerte und nie mehr verschwand -- dieses kleinen mädchens , das nun in san francisco lebt und heute vor ihnen spricht ?

T-5270 how can i speak in 10 minutes about the bonds of women over three generations , about how the astonishing strength of those bonds took hold in the life of a four-year-old girl huddled with her young sister , her mother and her grandmother for five days and nights in a small boat in the china sea more than 30 years ago , bonds that took hold in the life of that small girl and never let go -- that small girl now living in san francisco and speaking to you today ?

H-5270 14.54797077178955 how can talk that i girl and boys and i talk , and how 10 minutes girl ? how little talk about how i promise of four-four-four-four-four-four-four-four-by-five years ago , and girl , and talk , and girl , and girl , and a little girl beauty in a little girl beauty ... a little girl in a little girl . a little girl , and a little girl , and a little girl , and a little girl , and she could girl and she . on dangirl to boys and boys and .

S-7 dabei spielt es keine rolle , ob es sich um die penan in den wäldern von borneo handelt , oder die voodoo-akolythen in haiti , oder die kriegler in der kaisut-wüste von nordkenia , die curanderos in den anden , oder eine karawanserei mitten in der sahara . dies ist zufällig der kollege , mit dem ich vor einem monat in die wüste gereist bin . oder selbst ein yak-hirte an den hängen des qomolangma , everest , der gottmutter der welt .

T-7 and whether it is the penan in the forests of borneo , or the voodoo acolytes in haiti , or the warriors in the kaisut desert of northern kenya , the curandero in the mountains of the andes , or a caravanseral in the middle of the sahara -- this is incidentally the fellow that i traveled into the desert with a month ago -- or indeed a yak herder in the slopes of qomolangma , everest , the goddess mother of the world .
